# HELLO,

MY NAME IS STIG³²ʸᴼ AND THIS IS MY RESUME/CV

// ABOUT ME

I am a old IT guy living in Oslo with my wife and daughter. In my first IT job I was thrown into rather large projects as a Systems Consultant. With my head well beneath the waterline I managed to pull the projects together with the help of some search engines and contacts. My next IT job gave me access to leading teams in "conversion" project. I would get sparse information about a new customers in the weeks leading up to a weekend and when the workday on Friday was over the team would have until Monday morning to finish the conversion. Gradually learning a client has twice the amount of Users, hidden systems like door controls, factory automation tied into IT systems and super specialized printers from the 80s, can really put fear in someone responsible. Since those jobs I have relished the challenge of the new and difficult and with the years my experience has grown wide, making me able to tackle a lot of different challenges. For the last two years I have become especially fond of learning new systems and programming languages. I recently started learning Chef and it was fun enough that I finnished what i could of their learning Tracks in two weeks. At the moment I am studying the Ruby language to compliment Chef.
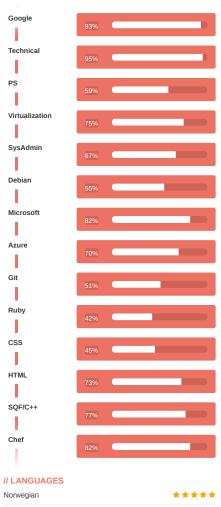

// EDUCATION

1985 — **I was born in Narvik**
This fantastic city in the far north gave me all i could want as a young boy growing up; everything from one month long summers to superbly poor municipality. Living in Narvik realy makes you learn to apppriciate the small thing in life, cause thats all one get there.

2001 — **High school majoring in general studies**
General studies being the "catch all" of highscool majors.

2004 — **High school majoring in culinary arts**
I started at this school cause i was unsure of what I wanted out of life. After finnishing the first year Hotell and Nutrition, I specialized as a Chef for the last year.

2006 — **Private high school retaking courses**
Continuing my lack of goals i started a few courses at SonansPG taking Physics, chemistry, biology and math

// EXPERIENCES

GP Office
2001
Cleaner and technical support
At Sentrum Legesenter in Narvik i was responsible for cleaning the offices, I also had a minor roll as a IT tech.

Nursing home
2007
Nurses assistant
General support and care of patients at Furumoen Sykehjem one of the "Closed" departments. My responsibilities included cleaning, dressing, feeding the patients and calming potential "situations".

Infolink
2008
Systems consultant
At infolink I was given a portfolio of small business customers, where I was responsible for systems architecture, sales, installation, support and billing. I was also resonible for the installation and setup of most client computers Infolink sold.

Intility
2010
Technician / Installasjon
I started as a technician in the Installations department at Intility. During this time I was the project leader during a upgrade of Standard Norge\Online, NEC and was "client computer responsible" for over 20 takeover projects.

Intility
2012
Teamleader / Repairs
Here I was the Teamleader for a very small group of technichians. The team was charged with problem correction on what was at that time 10000 client computers. At this time I was "client computer responsible" for over 15 takeover projects. I pushed for and organized a deal with Greentech, a green e-waste handeling company that pays for the usable systems they recieve. I allso initiated and organized a special deal with Lenovo, so that Intility personell could perform qualified(1st party) repairs on Lenovo phones, tablets, computers and servers.

Freelance IT
2014
Freelancer
I started a personal company to do small business IT support. I moved on because I was not able to aquire a large enough customer base to make a comfortable living.

Freelance
2016
Freelancer
For the last two years I have been doing freelance jobs in 3D modeling, game asset creation, webdev, programming, woodworking, leatherworking and restorations. Some of the project can be seen on my portfolio page @ egedenissen.no
